[kirichuk.me](https://kirichuk.me)

[evgeny@kirichuk.me](mailto:evgeny@kirichuk.me)

## SKILLS

JavaScript (TypeScript)  
React(Webpack, Next.js)  
HTML/CSS  
Node.js(Express, Nest.js)  
Swagger  
Docker  
AWS  
PostgreSQL  
MongoDB

Team Leading  
Team load planning  
Code review  
Mentoring

## EDUCATION

**B.S. Computer Mechatronic**  
September 2011 - June 2016

## EXPERIENCE

**Lead Full-stack Developer**      **Andersen Lab**      **July 2020 - present**

Led team of 5 software engineers undertaking the development of 7 front-end applications.

Engineered development environment and CI/CD processes for 3 cross platform applications using monorepository approach.

Partnered with back-end team lead for the design and construction of a product PostgreSQL database.

Reduced application load time by 200% using webpack code splitting, service worker, and requests/sources caching mechanisms.

**Full-stack Developer**      **OnePoint Ltd**      **May 2018 - July 2020**

Optimized a front-end application handling 1000+ websocket updates per minute using custom redux middlewares and memoization.

Developed chatbots for facebook games with 5000+ active users using Node.js.

Worked in open-core software development with 10 teams using LeSS framework.

Released 3 facebook games using JavaScript game engines in 9 month.

**Front-end Engineer**      **Yumasoft Inc**      **Dec 2015 - May 2018**

Mentored interns on team processes and product development.

Built components storybook collections for company products that enabled developers to quickly make changes.

Increased product tests coverage by 10% and components reliability by moving helper functions into common utilities.

Increased a product accessibility from keyboard and screen readers using HTML semantic best practices.

## PERSONAL ACTIVITY

### Public talks

[Quick start for React projects](#)  
WarsawJS Meetup #89, Warsaw

[Six Apps in 20 Minutes: Cross-Platform JavaScript Development with Monorepo](#)  
Andersen Front-end Hero Meetup, Krakow
